Hendry, Jr., Chief; Classification Systems Branch, Shirley S. Dungee, Chief; Trade Practices and Regulations Branch, Clifton S. Jordan, Chief; Economic Analyses and Special Projects Branch, Daniel W. Raaf, Chief; Shipping and Air Statistics Branch, Milton Kaufman, Chief; Textile Branch, Emanuel A. Lipscomb, Chief; Minerals and Metals Branch, Ralph C. Hamilton, Chief; Food, Animal and Wood Branch, John R. Anglin, Chief; Chemicals and Sundries Branch, James A. Dailey, Jr., Acting Chief; Machinery and Vehicles Branch, Jeanne M. Boocks, Acting Chief.

Economic Operations Division: Special Assistant, Samuel Schweid; Clerical Processing Branch, Max Van Horn, Acting Chief; Procedures Branch, Nathan Lesowitz, Chief; Foreign Trade Projects Branch, Nathaniel Swersky, Chief; Foreign Trade Section, Lucille P. Morgan, Chief; Foreign Trade Post Computer Review Unit, Janet J. Anderson, Supervisor; New York Office, Evelyn M. Levin, Chief.

Data Processing Systems Division: Assistant Division Chief for Operations, Rudolph M. Micoly; Machine Tabulation Branch, Joseph F. Pewterbaugh, Chief; Control Unit, Vincent H. Greer, Chief; Foreign Trade Project Planner, Curtis N. Risley; Foreign Trade Punching Group Willie A. McMurry, Supervisor.

Administrative Service Division: Graphics Branch, Robert H. Brooks, Chief; John F. Lanham, Assistant Chief.

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

SUGGESTED BRIEF CITATION

U.S. Bureau of the Census United States Import Statistics, Report FT 110, 1963 Annual. Washington, D.C. June 1964.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington, D.C. 20402 and Department of Commerce Field Offices. Price $1.00.

SPECIAL ANNOUNCEMENTS

ANNUAL 1963 DATA PUBLISHED IN TERMS OF SCHEDULE A AND TSUSA CLASSIFICATIONS

The Tariff Schedules of the United States Annotated (TSUSA), an official publication of the United States Tariff Commission embracing the legal text of the Tariff Schedules of the United States together with statistical annotation, became effective on August 31, 1963. Beginning on that date, TSUSA replaced Schedule A, Statistical Classification of Commodities Imported into the United States, as the basic reference manual for use in interpreting the published data. All published import commodity statistics since September are tabulated and published in terms of TSUSA.

The arrangement of cumulative import data in Report FT 110, United States Imports of Merchandise for Consumption, Commodity by Country of Origin, for calendar year 1963 has been altered by reason of the introduction of TSUSA effective with the September statistics as follows:

a. At the one and three digit SITC levels, dollar value totals are shown in the same manner as in the monthly 1963 issues. These are the sum of eight months of data under Schedule A and four months of data under TSUSA. No quantity totals are shown for the SITC data.

b. At the commodity level, within a given SITC group, there are two sections of data. The first section contains the cumulative eight month (January through August) data in Schedule A number by unit control by country of origin arrangement. This section is identified by "Sch A" in the margin to the left of the first Schedule A number within the SITC group. A second, separate section, contains the cumulative four month (September through December) 1963 data in TSUSA number by unit control by country of origin arrangement. This section is identified by "TSUSA" in the margin to the left of the first TSUSA number within the SITC group (immediately following the last Schedule A number within the SITC group). Totals within each section are shown for each level as in the monthly issues. There is no official correlation between Schedule A and TSUSA numbers for 1963. Consequently, it is not possible to show a calendar year 1963 total solely in terms of Schedule A or TSUSA.

Also effective with statistics for September 1963, SITC group code 001 was assigned to TSUSA numbers covering live animals whereas during January-August 1963 optional SITC codes 002 and 003 were assigned to Schedule A numbers covering live animals chiefly for food and live animals n.e.s., respectively. In order to obtain cumulative totals on imports of live animals, data for SITC groups 001, 002, and 003 have been combined into SITC group 001 in this publication.

UNITED STATES IMPORTS OF CERTAIN PHARMACEUTICALS EXCLUDED FROM THE STATISTICS, CALENDAR YEARS 1959-1963

The following table covers data on imports of pharmaceuticals which are not reflected in the import statistics for calendar years 1959 throug 1963. These data cover United States government purchases made abroad for which formal import entries were not filed at the time of arrival in the United States. Information as to month of entry is not available. Import data for 1959 through 1963 will not be revised to reflect the information shown below. Shipments of this type will be included in the import statistics beginning with 1964.

Commodity number[1]	Year	Country of origin	Value (dollars)
8140 590	1959 total		469,440
		Italy	469,440
8140 500	1960 total		1,478,092
		Denmark	288,594
		Italy	1,189,498
8140 500	1961 total		2,497,547
		Sweden	135,130
		Denmark	470,266
		Italy	1,892,151
8140 500	1962 total		2,044,219
		Denmark	181,774
		Italy	1,862,445
8140 500	1963 total		1,570,182
438.0200		Denmark	600,418
		Italy	969,764

[1]Schedule A numbers beginning with 1959 through August 1963; TSUSA number effective September 1, 1963.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments between the United States, its outlying possessions and Puerto Rico are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into a bonded manufacturing warehouse (other than smelting and refining warehouse), merchandise withdrawn from a bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in a bonded smelting warehouse.

Monthly and Annual Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the month immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment. Normally, the amount of the carry-over from month to month (and from year to year) remains substantially constant. For individual commodities, however, the carry-over procedure as a whole may result in the inclusion in the 1963 statistics of some shipments made in 1962, and/or the exclusion from 1963 statistics of some 1963 shipments which will be included in the statistics for 1964.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into a bonded storage warehouse, bonded manufacturing warehouse, or bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. Effective with statistics for January 1962, information is being compiled on United States general imports of merchandise by air. These data are published in Reports FT 380, FT 390 and FT 986. A more complete description of the coverage and presentation of the various types of statistics mentioned above will be found in the introductions to the specified reports.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements. Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COMMODITY INFORMATION

Commodity Classification

For the months of January through August 1963, the import statistics were compiled in accordance with the classifications in Schedule A, Statistical Classification of Commodities Imported into the United States. For the months of September through December 1963, the import statistics were compiled in accordance with the classifications in Tariff Schedules of the United States Annotated (TSUSA), an official publication of the Tariff Commission embracing the legal text of the Tariff Schedules of the United States together with statistical annotations. In this annual issue, as in the 1963 monthly issues of this report, the detailed commodity classifications are arranged in the order of the Standard International Trade Classification, Revised (SITC). The table entitled "Imports of Merchandise for Consumption by SITC Section by SITC Group" shows the SITC section and group codes and their descriptions along with 1963 annual value totals for these classifications. The value totals which are presented in this table and in the body of this report for the SITC section and group codes represent the sum of eight months data compiled in terms of Schedule A classifications combined with four months data compiled in terms of TSUSA classifications. At the detailed commodity level, within a given SITC group, cumulative January-August 1963 data

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification, see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

in Schedule A number by country of origin arrangement are presented first for the Schedule A numbers included in the SITC group, followed by cumulative September-December 1963 data in TSUSA number by country of origin arrangement. Lists showing the correlation between the SITC and Schedule A classifications appeared in the January 1963 issue of this report while lists showing the correlation between the SITC and the TSUSA classifications appeared in the September 1963 issue of this report. Copies of these correlation lists may be obtained from the Bureau of the Census.

Some of the commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are presented. For complete definition of the individual Schedule A or TSUSA classifications, reference should be made to these schedules. For further information regarding SITC classifications, reference should be made to the Standard International Trade Classification, Revised (United Nations Statistical Papers, Series M, No. 34, 1961).

Estimated Data for Low-Valued Imports

Import data are estimated for the following types of low-valued shipments: (1) since January 1958, imports valued under $100 reported on formal immediate consumption entries and imports reported on informal entries (by definition, valued not more than $250) and (2) effective January 1963, warehouse withdrawals for consumption valued under $100. Value estimates for these low-valued imports based on a one percent sample are reported under an arbitrary commodity number, Schedule A number 9999 500 from January 1958 through August 1963 and TSUSA number 999.9500 from September through December 1963. These estimates are excluded from the other individual commodity classifications. It follows that the statistics for individual commodities are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded amounts to about one percent of the monthly import total.

In this annual report, estimated data for low-valued imports are presented under commodity number 9999500, by country of origin, with value estimates for imports during the period January-August 1963 presented first, followed by value estimates, by country of origin, for imports during the period September-December 1963. For some countries, therefore, it is necessary to add the two value estimates together to obtain an annual total for low-valued imports from the given country. The value estimates for low-valued imports are included in the total for SITC group 990, the total for section 9, and the overall import total. The estimates are also included in the totals for individual countries as published in Reports FT 950-I and FT 120[3]. Although subject to considerable sampling variability[4], particularly where the estimated amounts are relatively small, these estimates may be of some interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the commodity data for individual countries.

SITC and TSUS Data for Periods Prior to 1963

With the change in presentation of the import commodity data in terms of the Standard International Trade Classification, Revised, users may wish to have information for periods prior to 1963 arranged in terms of the SITC, in order to make comparisons between the 1963 statistics and those for earlier periods. For 1962, monthly and annual data in SITC group by Schedule A commodity number by country arrangement are contained in machine tabulations which are available for use at principal reference locations. In addition, publications have been prepared containing 1962 monthly and annual value totals in SITC group by country of origin arrangement and in country by SITC group arrangement. The monthly and annual data are presented in separate publications. These publications also contain correlation lists in Schedule A commodity number by SITC group arrangement and in SITC group by Schedule A commodity number arrangement. A special publication containing import value totals in terms of the classifications in Tariff Schedules of the United States (TSUS) has been prepared for 1961. TSUS classifications are the 5-digit Tariff items from which the 7-digit TSUSA classifications are formed by combining the 5-digit item number with a 2-digit statistical suffix.

Classifications for Which Only Quantity Information Is Reported

For technical reasons, commodity numbers which have been established to provide for the reporting of quantity data only are excluded from all monthly tabulations and publications. (These commodity classifications should not be confused with those which provide for the reporting of the dollar value of imports and two units of quantity under the same number. For such classifications, data in terms of both units of quantity are included in this report.) Data for the quantity-only commodity classifications which are excluded from the statistics are compiled as supplementary information which is available from the Bureau of the Census. It may be necessary to make a small charge for the transcription of this information in the form of a special report. Reference copies of the supplemental information are available in the New York Office, Economic Operations Division, Bureau of the Census, Room 434, Customhouse, New York, New York.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. In instances where it is known that the country of origin cannot be determined, the country of shipment is shown and footnoted in this report.

The geographic definitions of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A and as Annex B in Tariff Schedules of the United States Annotated. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

[3] See Report FT 930-I for handling of the low-value estimates in the import reports by economic class, and Report FT 970-I for the handling in the reports by Customs District.

[4] The estimated total for low-valued imports reported under commodity number 9999500 is subject to a sampling variability of 3 to 4 percent. This means that the chances are 2 out of 3 that a complete tabulation would have resulted in a figure that differed from the estimate by no more than 3 to 4 percent. The estimates by country under commodity number 9999500 are subject to greater sampling variability - around 10 percent for countries with about 200 low-valued shipments in the sample; around 20 percent for countries with about 75 shipments in the sample; and over 20 percent for smaller sample sizes. For more detailed indications of the effect of sampling on the estimates for low-valued imports by country see the "Explanation" in front of Report No. FT 120, U.S. Imports of Merchandise for Consumption, Country of Origin by SITC Commodity Group.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name from the data for a commodity number indicates no imports of that commodity from that country valued at $100 or more reported on formal entries.

More precise information on a commodity by country basis is presented in this calendar year report than can be obtained by cumulating the data in the monthly reports. In the monthly issues of this report, for each Schedule A or TSUSA commodity classification, information for individual countries is shown only where the total for imports of the commodity from the country amounts to $10,000 or more. To save printing costs in the monthly reports, the data (if any) for countries with totals of less than $10,000 are combined for each commodity and shown as a total, identified as OTH CTY, at the end of the list of countries for the commodity. In this calendar year report, however, there is no basketizing of country totals and separate information is presented for each country from which imports of the commodity were reported in the statistics for the period covered by this calendar year report. As a result of this difference between the presentation in the monthly issues and the calendar year issue of this report, some commodity by country items which did not appear in the monthly reports may appear in the calendar year statistics.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies available for reference at public libraries). A Catalog of United States Foreign Trade Statistical Publications is also available. Supplementary information and explanations of interest to users of foreign trade statistics (such as announcements of changes in types of shipments covered by current statistics, unusual shipments, problems of valuation and classifiation, changes in statistical procedures, etc.) which were formerly included in a separate publication, Foreign Trade Statistics Notes, are now being included as special announcements in current issues of this report and other statistical publications. Copies of such announcements are also attached to reference copies of tabulations, where appropriate. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost of a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

IMPORTS OF MERCHANDISE FOR CONSUMPTION BY SITC SECTION BY SITC GROUP

SITC group code	SITC section and group description	Page number	Value (dollars)
	TOTAL IMPORTS OF MERCHANDISE FOR CONSUMPTION		17,013,748,016

[1]See SITC group 001; reported separately prior to September 1963 but combined with SITC group 001 for annual figures.

[2]Includes SITC group 941 during the months of January through August 1963.

[3]The SITC 3-digit description used here has been modified somewhat from that published in the United Nations' publication (Statistical Papers Series M, NO. 34). This modification does change the content of the United Nations' class.

[4]Certain uranium bearing material, formerly classified under SITC group 286, is included in SITC group 515 effective with September 1963 statistics.

[5]Not included in merchandise statistics.

[6]Includes SITC group 961 during the months of September through December 1963.

[7]Not classified separately in import statistics.

[8]Data cover the months of September through December only; included in SITC group 003 prior to September 1963.

[9]Data cover the months of January through August only; see SITC group 896.

(Schedule A numbers cover the months of January through August; TSUSA numbers cover the months of September through December. For further explanation, see the special notice, Annual 1963 Data Published in Terms of Schedule A and TSUSA Classifications, on page i in the front of this report.)
